🚫 1.0 About Pokelexia

🚫 1.1 What is Pokelexia?

Pokelexia is a mobile application which contains names, details, and even combat information for each and every pokemon. For all those pokemon fanatics out there, this application may serve as a quick reference for pokemon information or it may also be a place to learn what opponent you're facing and what elements are his/her weaknesses.

Pokelexia is somewhat similar to the classic pokedex, but Pokelexia is a better way to get Pokemon information since mobile phones are as common as a Rattata, and with the application, this would mean you could get pokemon informations anywhere even though you're stuck in an island or stuck in a bathroom while playing pokemon while trying to figure out how to defeat a Magikarp.

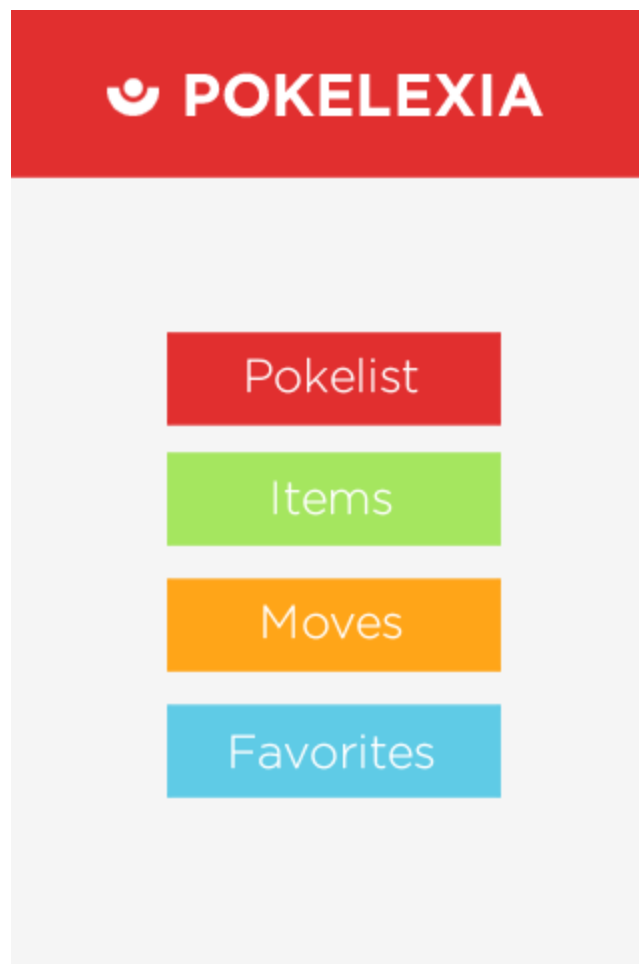

Pokelexia is the solution for a faster way to access information rather than exerting effort on turning on a computer and waiting for it to boot up and search it over Wikipedia, which would burns precious fats compared to just sitting on where you are and get the information in a few taps away. This applications isn't just a genius solution but it's also a work of art.

Do you want to be the very best like no one ever was? Do you want to catch 'em all? If your answer is yes, then you've come to the right place!
